

IdEAL Games

To win this IdEAL Games, your team will have to overcome the greatest possible number of tests (P1 to P10). To perform the tests, the team members must comply with the rules laid down in the description of each event, as well as statements which are given by the staff (portugueses teachers or students).

The team must elect a spokesperson. In theoretical tests (P3, P5, P7 and P9) will be accepted only the 1st answer given by the spokesperson so he/she shall consult the whole group before answering. Each group member must participate in at least 2 proofs, one of them practical.

Depending on the score obtained in each event, a color card will be awarded. This card must be kept in the envelope that was delivered to you. The team shall deliver to the staff (portuguese teachers or pupils) this envelope at the end of the game.

PROOF		DESCRIPTION	SCORE
